PRACTICAL EXPERIENCE

11/2025 - Present
42 Wolfsburg/Berlin e.V. - Wolfsburg

Coding Trainee

- Develop a strong programming foundation at 42 Wob, with expertise in C, Python, algorithms, UNIX, and network architecture.
- Expanding the fundamentals of artificial intelligence and machine learning.

09/2023 - 04/2024
Bremer Volkshochschule - Bremen

Berufssprachkurs - Ziel C1

- Improved language and communication skills for effective communication in a professional environment.

05/2022 - 08/2022
neuefische GmbH
Online Bootcamp

Data Science Trainee

- Full-time intensive coding bootcamp.
- 540 hours of programming practice with self-development of a project as a thesis and two additional machine learning projects.
  - Thesis: *The Energy Of Tomorrow, Forecasting building energy demand.*
  - EDA Project: *King County House Sales Analysis.*
  - ML Project: *Predicting Kickstarter Project Success.*

10/2016 - 03/2022
Johan Heinrich von Thünen Institute for Fisheries Ecology
Bremerhaven

Scientist

- Setup of small aquaculture recirculating systems, RFID system, computer vision, and biologger sensors.
- Experiment implementation, data collection, and data analysis.
  - Project VitAl: *Using behavior to assess fish welfare.*

06/2013 - 02/2014, 07/2015 - 09/2016
University of Hohenheim
Stuttgart

Researcher

- Data analysis and validation, evaluation and reporting. Market research and analysis of precision farming technologies, agricultural business management, and smartphone apps.
- Guest lecturer in the lecture "Agricultural Informatics".
- Support in structuring and organizing the Bioeconomy subject area in the "Euroleague for Life Sciences" network at Hohenheim.

LANGUAGES

Spanish: Native speaker
English: Fluent in speaking and writing
German: Fluent, C1 level

SOFT SKILLS

International experience
Analytical and solution-oriented
Flexibility
Independent work
Confident presentation technique
Self-organized activities
Team player

HOBBIES AND INTERESTS

Internet of Things
Electronics-DIY
3D-Printing
Cybersecurity and Data Protection
Learning to play guitar and piano
Photography

Wolfsburg, 17th March 2026

01/2005 - 10/2009
Delphi Automotive
Mexico Technical Center
Ciudad Juarez, Mexico

Global Manufacturing Engineer

- Implementation of the Delphi manufacturing system (similar to the Toyota Production System).
- Improvement of manufacturing processes considering cycle time, quality, cost, and work steps.
- Analysis of machine capacity and development of a tool for diverse model projects that take seasonal factors into account.
- Successful work in health management and occupational safety.
- Responsible for personnel policies in the production area. Successfully achieved project goals, e.g., error-free implementation of SAP R/3 at ”Shanghai Delphi Automotive Air-Conditioning”.

08/2002 - 12/2004
Delphi Automotive
Mexico Technical Center
Ciudad Juarez, Mexico

Global Packaging Engineer

- Analysis and implementation of customer-specific packaging requirements.
- CAD design, specifications, and prototypes for packaging.
- Implementation of improvements in packaging materials and procurement.
- Validation according to ASTM D4169 and training employees in packaging methods.

ACADEMIC BACKGROUND

10/2012 - 05/2015
University of Hohenheim
Stuttgart

M.Sc. Organic Agriculture and Food Systems

Master’s thesis: ”The effect of 100% protein substitution of Fish Meal by de oiled Jatropha curcas on the growth performance and body composition of Litopenaeus vannamei”.
Experimental Aquaculture, Innovations in Agriculture, Farm System Modeling, Precision Farming.

08/2005 - 12/2007
Institute of Technological
Higher Education Monterrey
Toluca, Mexico

Automotive Engineering

Product Design, Electronics and Automotive Control, Automotive Manufacturing, Foundations of Combustion Processes, Finite Elements Analysis for Automotive Industry, SPC, Fuzzy Control.

08/1996 - 12/2001
Institute of Technological
Higher Education Monterrey
Ciudad Juarez, Mexico

B.Sc. Business and Systems Engineering

Analysis and Design of Experiments, Statistical Process Control, Lean Manufacturing, Projects Evaluation, Operations Research, Cost Analysis, Manufacturing Processes, Theory of Constraints, Simulation, Total Quality Management, Planning Systems, and Systems Engineering.
